WHAT IS PILATES...

DEVELOPED BY J H PILATES, HE DEVELOPED A SYSTEM OF EXERCISES, INTENDED TO STRENGTHEN MIND & BODY.

- Pilates exercises, teaches precise & fluid movement with breath, allowing for better body mechanics, balance, co-ordination & body awareness.
- Helps strengthen your whole body not just your “core”, improving posture, increasing flexibility & stability & help prevent pain & injuries.
- Lessons offer a necessary time out, allowing you to feel rejuvenated, with increased confidence & comfort in your body.

HOW TO GET STARTED...

Each new client to the studio is requested to do an individual orientation/assessment class, which includes:

- Assessing your posture, strengths & weakness. Discussing your goals and personal needs.
- Teaching or refreshing the Pilates fundamentals & techniques.
- Beginners usually do a month of individuals or duets to better understand the fundamentals, before joining the groups.

WHAT TO WEAR?

Please wear exercise clothes allowing for full range of motion, socks & bring your own head towel for hygiene.

We Look forward to working with you.
